

Tagline

Aspiring SOC analyst focusing on securing the digital Frontier and passionate about monitoring,threat interlligence and intitating defense response

Bio

Driven Cybersecurity student specializing in network protection and security monitoring. Combining a solid foundation in web technologies (HTML,CSS,JAVASCRIPT) and python with a passion for offensive security and OSINT(OPEN SOURCE INTELLIGENCE) to monitor, analyze and mitigate digital threat

Career aspirations

To advance into a senior security operations role, moving from a foundational SOC Analyst position to a Threat Hunter and Security Architect. My long-term goal is to pioneer intelligent detection frameworks that combine robust Python automation with advanced threat intelligence, to help security teams spot and stop network threats before they cause damage.

Technical skills

- Core languages: Python,HTML,CSS
- Security and operations: Network protection, threat monitoring , OSINT
- Tools and environment: VS code

Hobbies /Interest

- Cybersecurity Labs: Building home networks and exploring Open Source Intelligence (OSINT) tools.
- Problem Solving: Challenging myself with mathematical puzzles ,natural science equations and also playing logic games like (chess)
- Web Development: Continuous learning by coding small applications , scripting in Python , designing and creating webpages
